DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-12, 25-27 and 40-42 are drawn to compositions and a method of treating amyloidosis in a subject with a combination of a chelator specific for copper and clioquinol, classified in class 514, subclasses 311 and 501.
- II. Claims 13-15, 28-30, 43-45 and 55-57 are drawn to compositions and methods of treating amyloidosis in a subject with a combination of an alkalinizing agent and clioquinol, classified in class 514, subclass 311.

The two inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different subject matter for inventive effort. Further, a reference which anticipates any one of the above inventions would neither anticipate or make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner K. Weddington whose telephone number is (703) 308-1235.
